

Platinum Primed Mouldings

Go
Green!

MOULDING & MILLWORK

- Contains no urea-formaldehyde
- Meets CARB Phase II requirements
- 100% recycled wood fiber
- Harvested from responsibly managed forests
- Manufactured domestically
- Platinum Prime™ premium finish
- Qualifies for LEED™ credits as a “Low Emitting Material”.
- Platinum Prime™ smooth paint and go finish
- Smooth machined profiles and edges
- Precise tolerance standards.

Ready For Paint

MDF Mouldings

Are manufactured to exacting quality standards from #1 quality medium density fiberboard. MDF offers the advantages of finger joint pine without the disadvantages. Standard builder lengths, 100% defect free with no knots, no checks, no splits, no raised or torn grain, more resistant to dings and dents, and you can drill, rout, saw, nail, cope, screw or shape without chipping or splitting. MDF mouldings come to you primed with a lacquer based primer which provides a clearly superior paint surface to products primed with water based primer.

Ultralite MDF mouldings are lightweight for simplicity of installation and handling. Cuts, copes mitres, nails and staples with ease. Ultralite Supercoat MDF mouldings are “finished” with a unique two coat process that gives them the smoothest and finest primed surface available today.

- Defect free - The flat, smooth surface is uniform, dense and free of knots & grain patterns.
- High quality raw material - MDF's uniform nature gives it consistency from surface to core.
- Smart length supply - Engineered products create a variable length supply.
- Domestic manufacturing - By producing material domestically, we promote responsive lead times.
- Platinum Prime Finish - Platinum Prime mouldings use an exclusive finish with a dual coat, dual sand process which minimizes.
- Superior Workability - Platinum Prime mouldings have the handling and machining qualities of fingerjoint pine. Copes and miters with ease. Does not chip or split.
- Installs with Ease - Platinum Prime nails like fingerjoint. Platinum Prime MDF will not volcano (unlike standard MDF).
- Superior Paintability - With quality paint, one coat is often enough. No grain raise. Less paint for total coverage.
- Responsible Choice - Certified for Recycled Content. This product meets Lead™ requirements for credits. Available with no added Formaldehyde.
