

Interior & Exterior Panels

NextStone

Manufactured with specially formulated polyurethane combined with fire retardants and UV inhibitors, NextStone™ simulated stone siding is cast from actual stone and rock. The unique manufacturing process gives the products the most authentic “faux” stone siding on the market today.

- Easy Installation - Use standard woodworking tools
- Cost Effective - Save on installation time
- Lightweight - About one pound per square foot can be handled easily by a single installer
- Durability - Proven Polyurethane product with specially developed in-mold coating system for long life.
- Realistic - Most people need to touch it before they can believe its not real rock
- Versatility - Use on interior or exterior walls, knee walls, wainscoting, facades, islands, patio enclosures.

Real Wood T&G Panelling

The Natural Remedy to Tired Walls

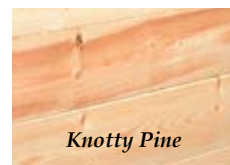

You have scuffed painted walls, faded or out-dated wallpaper, and there you are, with a decoration job on your hands. Or you are finishing an empty space into a room, closing off a basement or attic, and there you are with a wall building job to do. Beautiful, warm wood panelling is your answer! It can be done quickly and it's easy to do, with just the basic tools commonly found in a do-it-yourselfer's workshop.
