

Tools of the Trade!

Exchange-A-Blade • Easy as 1, 2, 3!

How it works...

These blades are engineered from the finest materials. When you exchange your dull blade for a reconditioned one, you are getting back a sharpened, cleaned, balanced blade with the carbide tips ground to razor sharpness or replaced if need be. You'll find these Exchange-A-Blade saw blades equal in performance to any new blade, guaranteed.

1. Buy It

Start by choosing the right blade for the job from over 103 saw blades using the easy-to-read saw blade selector.

2. Use It

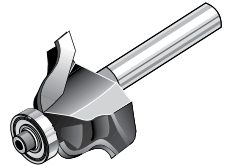

You'll find a picture on each blade label indicating the material for which the blade is best suited. The professional and Industrial Carbide blades are hard bodied and surface ground. C2 and C4 tips are used to provide the ultimate combination of durability and precision cutting.

3. Bring It Back

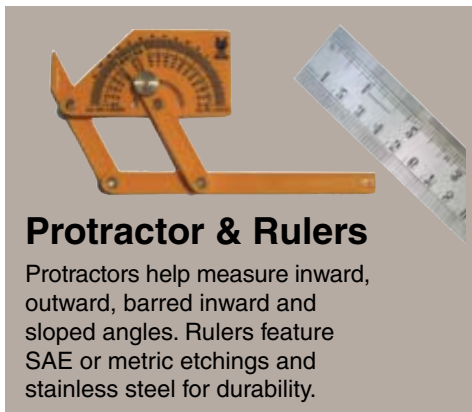

When your Exchange-A-Blade™ is worn and dull, simply bring it back to your local Windsor Plywood and exchange it for a new blade. sometimes saving up to 75% off the original price.

Includes Router Bits too!

The Exchange-A-Bit program provides for over 85 industrial quality router bits in assorted styles and sizes.

- Excellent for general purpose work through to fine cabinet detailing.
- Router bits are available in 1/4" and 1/2" shanks.
- Made of the finest Tungsten carbide to provide long life.

Protractor & Rulers

Protractors help measure inward, outward, barred inward and sloped angles. Rulers feature SAE or metric etchings and stainless steel for durability.

Wood Clamps

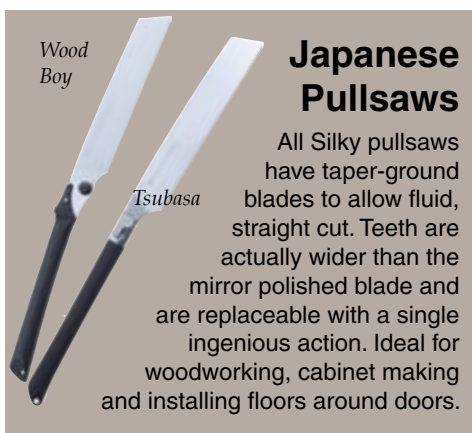

Clamps are a must have for woodworkers and home do-it-yourselfers. Features sliding bar grip, cast iron jaws, steel screw hardwood handles and quick release.

6" Electronic Digital Caliper

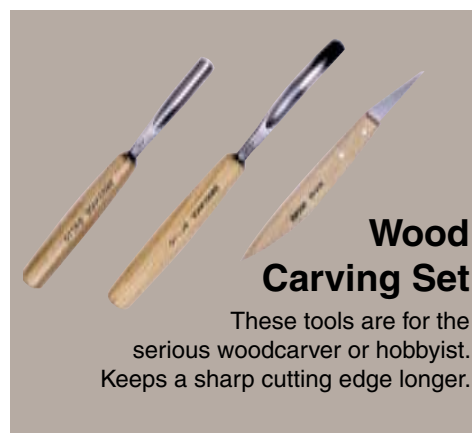

- 6" x 0.0005" / 150 mm x 0.01 mm
- Stainless steel
- Thumb wheel adjustment
- Depth gauge
- Comes with case and extra battery

Measure Twice, Cut Once!

Japanese Pullsaws

All Silky pullsaws have taper-ground blades to allow fluid, straight cut. Teeth are actually wider than the mirror polished blade and are replaceable with a single ingenious action. Ideal for woodworking, cabinet making and installing floors around doors.

Wood Carving Set

These tools are for the serious woodcarver or hobbyist. Keeps a sharp cutting edge longer.
