

QUIETDOWN ACOUSTIC UNDERLAYMENT

Symar® QuietDown® is a high performance acoustic underlay engineered from recycled rubber to reduce sound transmission through subfloors

Specially formulated for your flooring type

Available for hardwood and laminate flooring. QuietDown offers incredible sound-dampening qualities. Easy to install 4' x 3-1/2' panels are thinner, lighter and stronger than conventional underlays.

Proven results

Tests by the National Research Council show that QuietDown is effective at reducing mid- to high-frequency impact sounds beneath hardwood and laminates. For example, QuietDown under hardwood achieves an FIIC rating of 61. Translation: impact sounds such as speech, people walking in hard-soled shoes or dropped toys, pots, pans etc. will be reduced.

Green Materials

QuietDown is engineered from recycled rubber - so every square foot you install means less landfill waste. For contractors, this means it contributes to the 'green content' in new construction.

Where to use QuietDown

Use QuietDown in any room where sound transmission is a concern - condominiums, kitchens, playrooms, etc. QuietDown is also suited for institutional settings and anywhere else where noise transmission is a concern.

Installs in a flash

QuietDown is perfect for do-it-yourselfers. Laying and trimming QuietDown is quick & easy. Installation instructions can be downloaded from www.quietdown.com

Features and Benefits:

- QuietDown is an extremely durable 100% vapour barrier, is mildew, insect repellent and will not rot or fall apart over time
- It has low surface deflection & will not sag or compress like foams and felt fibre underlays
- Provides a high coefficient of friction reducing creeping and movement of floating wood systems
- QuietDown's natural physical properties also offer excellent thermal R values reducing passive thermal loss
- Easy to handle sheet versus rolls make for less waste, lays down flat with no curled edges
